Affordable mid range track bike - Trentino

Monday 14th September 2009 - Robert Cumine

The Trentino from Pro-Lite, was first released in 2005 and now is probably one of the best value for money mid-range track bikes available in Australia.

Following more than two years of development and testing, the Trentino was finally rolled out near the end of 2005 on the race circuits in both Europe and Australia. Not only did these beauties attract an awful lot of attention, they also won a lot of races.

Each frame is carefully hand crafted and built with Pro-Lite PBS tubing to provide a very fast and responsive frame that is without doubt the power, body and soul of the bike.

Using stainless steel cnc machined drop outs and cnc machined head tubes and bottom bracket shells, the race is now on to make sure we can produce enough tubing to meet the demand.

FRAME, Trentino AL7005 Track frame, CNC curve seat tube. Stainless dropout, Matt black

FORK, GIOVANNI carbon aero racing fork, AL crown and dropout

HEADSET, AMPEZZO Integrated headset, 1-1/8", angular contact bearing/AL top cap.

SADDLE, CLES Racing saddle

SEATPOST, AZZIO Alloy 3 D forged one piece Laid back seat post,

PRO-LITE "Azzio" 27.2 MM * 350 MM. Shot peening and Black

WHEELSET: ROSA Rosa-P33-AH Alloy 30 mm Wheelset, Rosa Alloy 2x2
